DETAILED ACTION

1. Lack of Unity

A. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-4 and 16, drawn to a method of inhibiting the binding of NOD2 to procaspase-1.

Group II, claims 5, 14 and 15, drawn to a method of identifying a compound that inhibits the binding of NOD2 to procaspase-1 and a reagent kit

Group III, claims 6-13, 17 and 18, drawn to an agent for inhibiting the binding of NOD2 to procaspase-1.

The invention listed as Groups I-III do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: the special technical feature of Group I is a method of inhibiting binding of NOD2 to procaspase-1. The special technical feature of Group II is a method of identifying a compound that inhibits the binding of NOD2 to procaspase-1. The special technical feature of Group III is an agent which inhibits the binding of NOD2 to caspase-1.

The special technical feature of each group is not the same, or does not correspond to the special technical feature of any other Group. The products of Groups I-III are structurally and functionally distinct. The Groups are not linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept.
